

10

We claim:

1 In a television system in which at least program title
information for programs which are to be transmitted in the
future is transmitted in advance to form a channel guide list,
5 apparatus comprising:
memory means for storing data representing said
channel guide list and for storing user-entered data;
data entry means for entering said user-entered data;
control means for performing a search of said channel
10 guide listing for a match to specific user-entered information;
on-screen display means for displaying text or
graphics under control of said control means; and
means for selecting a television program for viewing;
upon successful conclusion of said search, said control
15 means schedules a selection of said television program, or controls
said on-screen display means to notify said user of an availability
of said television program.

20 2. The apparatus of claim 1 wherein, when television
program-descriptive text accompanies said channel guide list, said
control means performs a search of said television program-
descriptive text for a particular text string which may relate to
title, star, director, or context of said television program.

25

3. The apparatus of claim 2 wherein, in response to user-
entered data said control means controls said on-screen display
means to display a list of user-entered search criteria, and user-
30 entered instructions for execution after successful completion of
each search.

4. The apparatus of claim 3 wherein, said on-screen user-entered instructions for execution after successful completion of
5 each search include instructions to record said television program and instructions to notify the user of an availability of said television program.

10 5. The apparatus of claim 1 wherein, said control means notifies said user of said availability of said television program by modifying a portion of channel guide display relating to said program.

15 6. The apparatus of claim 1 further including a remote control unit wherein, said user-entered data is entered by means of a screen displayed keyboard operated by selecting keys of said keyboard via cursor commands transmitted by said remote
20 control unit.

7. The apparatus of claim 1 wherein, said user-entered search criteria form logically-ORed search terms.

25

8. The apparatus of claim 1 wherein, said user-entered search criteria form logically-ANDed search terms.

9. The apparatus of claim 1 wherein, said user-entered search criteria form logical compound statements employing logic operators, such as AND, OR, NOT, or XOR to logically-connect search terms.

10. In a system in which at least program title information for television programs which are to be transmitted in the future is transmitted to form a channel guide list, apparatus comprising:

memory means for storing data representing said channel guide list and for storing user-entered data;

15 data entry means for entering said user-entered data;

control means for performing a search of said channel guide listing for a match to specific user-entered information;

on-screen display means for displaying text under control of said control means; and

20 upon successful conclusion of said search, said control means controls said on-screen display means to notify said user of an availability of said television program.

25 11. In a television system in which at least program title information for programs which are to be transmitted in the future is transmitted in advance to form a channel guide list, a television program searching method, comprising the steps of:

30 storing in a memory means data representing said channel guide list and storing user-entered data;

entering said user-entered data via a data entry means;

performing a search of said channel guide listing for a match to specific user-entered information; and

upon successful conclusion of said search, scheduling a selection of said television program, or notifying said user of an availability of said television program.

12. The method of claim 10 wherein, when television program-descriptive text accompanies said channel guide list, including the further step of:
